

Software Engineering (ESOF)

ESOF 322. Software Engineering. 3 Credits.

This course continues CSCI 221. It entails program implementation, testing, debugging, and documentation of a complete system. It includes project management techniques such as ISO 9000 standards, Visual Basic, Access, ODBC connections and programming logic. Prerequisites: CAPP 120 or higher, CSCI 111, CSCI 110, CAPP 158, and CSCI 221. Formerly CIS 365 or ISET 365.

ESOF 392. Independent Study. 1-12 Credits.
